Intended use

The wall light is intended exclusively for lighting indoor rooms. It may only be mounted on a solid interior wall and must be installed in accordance with these instructions. Any other use (for example as a fixing point, for decoration or for connection to other devices) is considered improper and can result in danger to persons and damage to property.

This light can be used by children aged 8 years and above and by persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they are supervised or have been given instruction on the safe use of the light and understand the hazards involved. Children must not play with the light. Cleaning and user maintenance must not be carried out by children without supervision.

Safety

- Do not operate a damaged light and do not repair it yourself. Repairs only by qualified personnel (via the dealer).
- The product must not be exposed to strong mechanical stress, moisture or heavy soiling.
- Modifications or alterations to the light are not permitted and void the warranty.
- Use the light indoors only. Do not use it to light outdoor areas or in open/unprotected areas.

- Never cover the light.
- Unsuitable lamps can overload the light. Never use lamps with a higher wattage than specified. Risk of fire.
- Clean the light with a dry cloth only. Do not use water or cleaning agents.

Installation requirements

Safe and correct installation is only guaranteed if all requirements are met.

Read these instructions completely before installation and commissioning, and keep them for future reference.

Installation and electrical connection must be carried out by a qualified electrician only.

Before starting installation, disconnect all relevant circuits from the power supply and secure them against being switched on again.

Make sure that no concealed cables or installations are damaged at the mounting location.

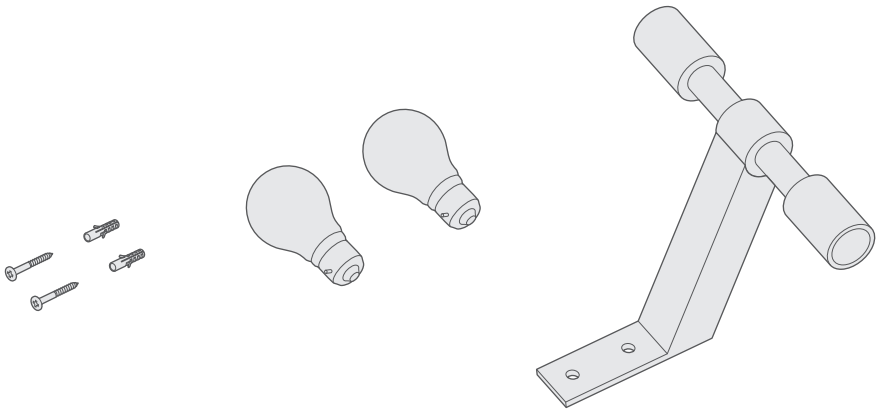

The light must be earthed.

The wall must be able to bear the load.

Scope of delivery

Use only the fixing material supplied.

Technical data

Dimensions (mm):	H = 153 × W = 140 × D = 140
Material:	Brass MS 58, finely brushed
Test marks:	
Degree of protection:	IP20
Protection class:	I
Operating voltage:	230 V/50 Hz
Power consumption:	max. 2 × 15 W
Base (lamp base/socket):	Ba15d
Dimmable:	yes
Light distribution:	360° beam angle, uniform
Minimum distances:	0,2 m
Weight:	489 g
Ambient conditions:	
Temperature range:	0 °C…40 °C
Relative humidity:	20 %…80 %

Disposal

At the end of its service life, the light must not be disposed of with household waste. Waste electrical equipment must be handed in at an approved collection or return point. Distributors of electrical and electronic equipment are also obliged to take it back.

Remove the lamps before disposing of the light.
